

Gym Membership Management Application

Team Members: Jebelean Razvan, Timariu Florin

General Description:

This application aims to help both gym goers and gym staff by offering the possibility to improve the ease of managing the members and memberships.

Registration (for both Members and Staff): The user needs to first register into the application by selecting one of the 2 roles: gym member or gym staff. Both roles require a unique username, a password and the basic information like full name / Gym name, address, payment information, and phone number.

Members:

A member needs to login into the application to see his membership status and a list of available gyms.

A logged in member can manage his membership renewal, cancellation and modification of membership plans and associated member details within the gym's system.

A logged-in member can engage in fitness challenges by creating, participating in, tracking, and managing challenges and related activities to enhance member interaction and motivation within the gym community.

Staff:

A staff member needs to login into the application to manage/add a gym, manage its members, memberships and plans.

A logged-in staff member can oversee the registration, renewal, cancellation, and modification of membership plans, along with associated member details, within the gym's administrative system.
